

Artificial Intelligence Assistant Trend

“Over time, the computer itself – whatever its form factor – will be an intelligent assistant helping you through your day. We will move from mobile-first to an AI-first world.”

Sundar Pichai, Google CEO

28 April 2016

“Chatbots will fundamentally revolutionize how computing is experienced by everybody.”

- Microsoft CEO Satya Nadella, July 2016

Botkit

Open-source toolkit for creating bots

Botkit is the most popular open-source toolkit for creating bots for messaging platforms. It provides a semantic interface to sending and receiving messages so developers can focus on creating novel applications and experiences.

Botkit is completely free to use and [available on Github](#).

Installing Botkit

Botkit is available via [npm](#). Download the package locally using the following command:

```
npm install --save botkit
```

Botkit Studio

Supercharged tools for Botkit users are coming soon from the Howdy team! [Sign up here to get early access](#).

Join the community

You can get help from the thousands of developers building with Botkit. Are you having trouble? Found a bug? Please browse the [GitHub Issues](#) to see if your issue is already being addressed.

Need more one-on-one chat? You can join over 2500 developers building

The screenshot shows the Microsoft Bot Framework website. At the top, there's a banner with the text: "There's a new version of the Microsoft Bot Framework. Update your bot now to use cards, carousels and action buttons. Learn how >". Below the banner, there's a large image of a man with a beard working at a computer. On the left side of the image, there's a purple gear icon. On the right side, there's a conversation window. The conversation starts with a message from the bot: "Haircut on Saturday". The user responds with: "I have these times available: 10:30 AM, 11:30 AM, See more". The bot then asks: "Great! Does this look correct?". The user replies: "10:30 AM". The bot also shows a small image of a woman getting a haircut.

Why not use a “kit” or “framework”?

api.ai = Google

The screenshot shows the api.ai homepage. At the top, there's a dark header with the api.ai logo, navigation links for API & DOCS, PRICING, NEWS, BLOG, FORUM, ABOUT, LOG IN, and SIGN UP FREE. Below the header is a large banner featuring a person typing on a laptop and a smartphone displaying a messaging interface. The text on the banner reads: "Conversational User Experience Platform. Now we're talking." and "Build brand-unique, natural language interactions for bots, applications, services, and devices." A prominent orange "Get Started for Free" button is at the bottom left. The background of the page is a blurred image of a person working on a laptop.

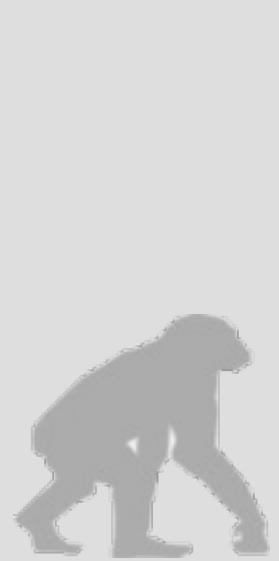

wit.ai = Facebook

The screenshot shows the wit.ai homepage. At the top, there's a header with social media icons for Twitter and Facebook, and navigation links for GETTING STARTED, DOCS, COMMUNITY, PRICING, FAQ, BLOG, and JOBS. Below the header is a section titled "Natural Language for Developers" with icons for Bots, Mobile apps, Home automation, Wearable devices, and Robotics. The text below the icons says: "Users enjoy a hands-free mobile experience while driving, working out, or Developers use Wit to easily build a voice interface for their app." At the bottom, there are two login buttons: "Log in with GitHub" and "Log in with Facebook", along with a link to "see how it works".

luis.ai = Microsoft

The screenshot shows the luis.ai homepage. At the top, there's a message: "The programmatic API keys will no longer be used in the endpoint starting 31/12/2016!" with a close button. Below this is a large teal section with the heading "Language Understanding Intelligent Service (LUIS)". The text says: "LUIS lets your app understand language". It lists two bullet points: "► LUIS is in beta and free to use" and "► Supported browsers: Internet Explorer 10/11, Chrome". At the bottom of this section are two buttons: "Sign in or create an account" and "Watch Video!". To the right of this teal section is a graphic of clouds and binary code (1s and 0s).
